

## Help Manual to take a digital proctored assessment in iON

1. Once you launch the assessment from iON, you will be taken to the self-registration and candidate consent form, where you need to select your camera as shown in the below picture. Once you select the camera, you need to click 5 pictures of yourself and validate it using the validate button as shown below. Please note that the validate button will turn green once you click the pictures of yourself.

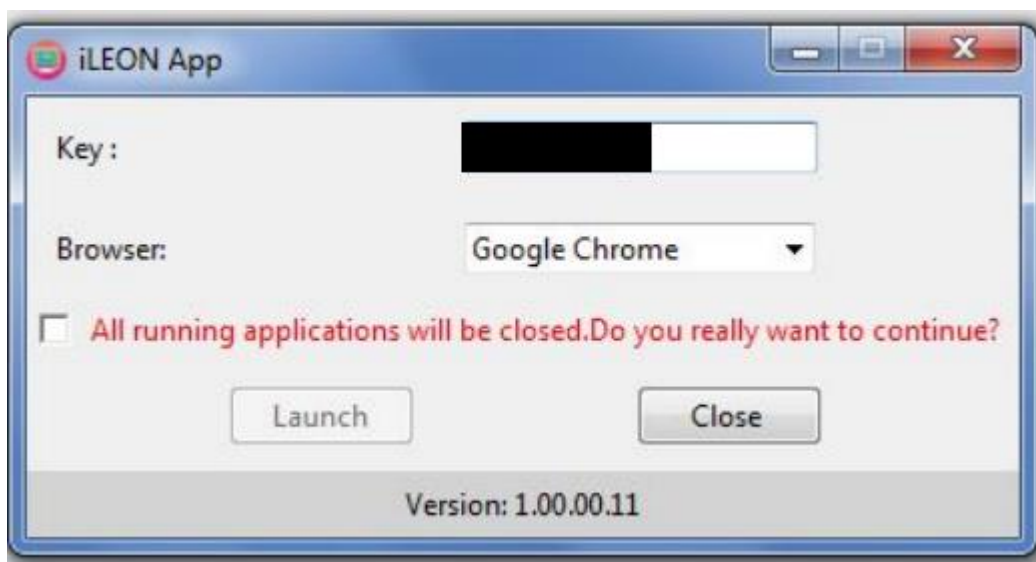

The screenshot shows the 'Self Registration and Candidate Consent' interface. At the top, there is a blue header with a circular icon of a person using a smartphone on the left and the title 'Self Registration and Candidate Consent' in the center. To the right of the title is a language dropdown menu set to 'English'. Below the header, there is a camera selection button labeled '--Select Camera--' with a small 'v' icon. The main instruction reads: 'To continue with Self Registration, Kindly click your pictures using the camera button below.' Below this is a note: 'For best results, click photos where your face is clearly visible. [View Photo Specifications](#)'. A large black rectangular area represents the camera feed. Below the camera feed is a green circular button with a white camera icon. Underneath the camera feed are five square placeholder icons for photos, each containing a grey silhouette of a person. Below these icons is a note: 'Note: Capture minimum of 5 Photos for Self Registration'. A consent section follows, starting with a checkbox and the text: 'I provide my explicit consent to capture my photo for registration and capture the photo/video for proctoring (invigilation) to prevent malpractices during the assessment. I understand that, this consent is required for the collection and use of personal data for'. At the bottom center is a grey 'Validate' button.

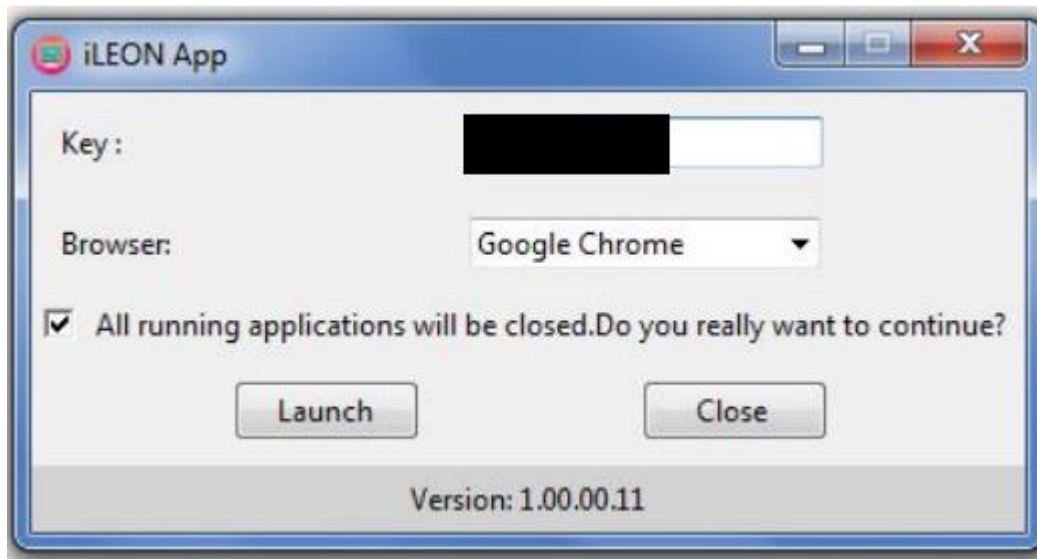

2. Once the validation is completed, you will see the below screen from where you need to download the iLEON app. You can download either the zip file or the exe. Please download the file for your specific Operating system/

3. After the app is downloaded, you need to launch it by double-clicking on the exe file (IBA launcher). Once the app is launched, you need to provide the key that is displayed on your screen as shown below. You can also select your browser from the list of browsers displayed in the drop-down list.

4. Please check the option to close all your running applications. The launch button will be activated only once you check the box. ***Please note that all your running apps will be closed once you launch the app.***

5. Your assessment will begin in a secured iON environment once the app is launched.
